

Business Unit:

„Innovative and ambitious models for funding often provide the final impulse for break-through of new ideas.“
(Erich Hau, Windkraftanlagen, P. 740).

In order to pre-finance interesting German and international renewable energy projects, we intend to place project development funds. Raised funds shall be paid off to project developers who will use them to finance the development stage. The return on investments is yielded from the sales revenues.

We are positioned between project developers and capital providers and offer our commercial and technical skills to achieve a high profitability and efficiency of the projects.
